

M.D. KINSSELLA No. 424 Council Minutes

Meeting was held at Kinsella on October 1st, 1931.
Full Council present.
Coun. Lisson, that minutes be passed as read. Cd.
Coun. Murray, that should any relief be necessary, all such relief must be worked out on roads. Cd.
Coun. Bawdon, that the following be the terms of sale of the lands under the Tax Recovery Act:
Under \$200.00 — all cash.
Over \$200.00 — \$100.00 cash, and the balance \$100.00 each December 1st with 7 per cent interest, until the whole be paid.
Cash to mean \$25.00 at time of sale and the balance within thirty days. Carried.

The following lands were offered for sale:
S. E. 16-46-11-w4th, sold to Pete Larson for \$475.00.
N. W. 36-46-11-w4th, not sold.
S. E. 36-46-10-w4th, not sold.
Lot 38, Block 8, Jarow sold to A. Skagholm, Jarow for \$130.00.
Coun. Pendleton, that above sales be ratified. Cd.

Coun. Murray, that Secretary notify Dr. J. R. Murray that they are not responsible for his bills. Cd.
Coun. Murray, that Council borrow \$1,000.00 from Bank of Montreal for current expenses. Cd.
Coun. Lisson, that application for Old Age Pension made by Mrs. G. Haugen be approved. Cd.

Coun. Pendleton, that application for Old Age Pension made by Mrs. J. Lien, be approved. Cd.
Report of Weed Inspectors O'Neill and Plummer was read. Moved by Coun. Pendleton that report be accepted as read. Cd.
Letter re road allowance at Jarow from C. N. Rlys was read and Secretary was instructed to inform C. N. Rlys that this land has not yet been surveyed. Cd.

Coun. Carter, that Secretary insert in Newspapers a letter informing ratepayers of the meaning of the Tax Consolidation Act. Cd.

Coun. Lisson, that Reeve Bradley be appointed delegate to Annual Municipal Convention. Cd.
Coun. Pendleton, that delegates expenses for annual Convention be \$30. Carried.

Coun. Carter, that Secretary forward a resolution to Convention to the effect that Farmers be not made responsible for the Weeds on road allowances. Cd.

Coun. Murray, that Secretary inform Royal Alexandra hospital that they do not consider that Miss Margaret Dinwoodie is or was an indigent. Cd.

Coun. Lisson, that compensation for land taken for Road Allowance on North half of 30-46-10-w4th—4.45 acres be paid for at the rate of \$20.00 per acre for 1-1-2 acres and \$15.00 per acre for 2.95 acres. Cd.

Coun. Carter, that Coun. Murray gets delegation from Division 5 to investigate site of Kinsella cemetery, as complaints have been received re same. Cd.

Coun. Murray, that Reeve Bradley, W. Pendleton and Secretary Green be appointed a committee to act in connection with 1930 Seed Grain accounts.

Coun. Pendleton, that Council accept \$50.00 from Mr. O'Neill as 1931 payment on account of 1930 Seed Grain advances. Cd.

Coun. Bawdon, that the following bills be passed for payment:

Third & Ansell	\$18.97
J. Bawdon	5.00
H. Overbo	3.30
T. O'Neill, Jr.	3.00
T. A. O'Neill	53.60
B. Rudd	39.80
F. Williams	5.00
A. S. Ragholm	13.45
P. S. of Training	15.00
H. Tebbok	7.20
Mrs. J. Olson	7.20
L. Knudson	5.00

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES
The services next Sunday will be at Paschendale, Roseberry—and Irma. This will be a Thanksgiving service and we urge all friends to come to worship next Sunday. The following lines are taken from "The New Out-lookers for a Thanksgiving meditation."

Because of Thy Great Bounty
Because I have been given much,
I too, shall give;
Because of Thy great Beauty, Lord,
Each day I live
I shall divide my gifts from Thee
With every brother that I see
Who has the need of help from me.
Because I have been sheltered, fed,
By Thy good care,
I cannot see another's lack
And I not share
My glowing fire, my loaf of bread,
My roof's shelter overhead,
That he, too, may be comforted.
Because love has been lavished so
Upon me, Lord,
O wealth I know that was not meant
For me to hoard,
I shall give love to those in need,
The cold and hungry clothe and feed,
Thus shall I show my thanks indeed.
—By Grace Nell Crowell.

ANGELICAN CHURCH
The Ven. Archdeacon A. E. Burgett, M.A., is expected to take the service on Sunday, October 18th at the United Church at 3 p.m.
Rev. A. M. Trendall, Vicar.
The next W. A. meeting will be held at the home of Mrs. Pryce Jones on October 12th at 2.30 p.m.

Special Notice.

Feeling sure there are any number of our own people who have more potatoes and vegetables they can store, also that so many of our own people to the south of us are without the bare necessities of life and no means of securing them; feeling that our own people here would much prefer to see these vegetables go to people who are in actual need of them, rather than to waste, the Women's Institute are appealing to you for your help, that they may land a car of potatoes and vegetables, at a very early date, such as next week, to send to the stricken areas in our own province. Please get in touch with Mrs. Fisher, Mrs. Schorier, Mrs. Masson, Mrs. McFarland or Mrs. Knudson at the Post Office.

We feel the community has always been behind us in our efforts in the past and we feel sure this appeal for help where it is so badly needed will meet with tremendous response.

Thank you.
We have arranged to store these vegetables in Mr. Dick Larsen's implement house.

Coun. Carter, that meeting adjourn till call of Secretary. Cd.

B. H. GREEN, Sec.-Treas.

Mr. Justice W. M. Martin

ONE of the most important committees of the World's Grain Exhibition and Conference is known as the Citizens' Committee. This committee acts as a medium through which matters pertaining to the mutual welfare of the Exhibition and Conference and the city of Regina (where the world-wide event is to be held in 1932) are carried to the organizations having representation on the committee.

Mr. Justice W. M. Martin, of the Court of Appeal of Saskatchewan, is chairman of the citizens' committee. He was born at Norwich, Oxford County, Ontario, and received his education at the Exeter Public School, Clinton Collegiate Institute, Toronto University and Osgoode Hall.

Moving to Regina in 1903, Judge Martin engaged in the practice of law. He was elected to the House of Commons as member for Regina in the elections of 1908 and 1911. In 1916 he was called upon to assume the Premiership of Saskatchewan and also took the portfolio of education. He became a member of the Court of Appeal of Saskatchewan in 1922.

(By Gee)

NOTICE

TO THE RATEPAYERS OF THE MUNICIPAL DISTRICT OF KINSSELLA, No. 424

I have been instructed by the Council to have inserted in this newspaper a short explanation of the Tax Consolidation Act.

The owner of any farm land who had arrears of taxes on January 1st, 1931, and which arrears are still in arrears, may make application to the Secretary of District to have these taxes consolidated, which means that the whole amount of the arrears together with 7 per cent interest will be divided into five equal payments, the first payment, together with the current years taxes to be paid to the Secretary on or before 15th of December, 1931, the second payment December 1932 and so on.

If any farm land owner enters into this agreement with the Council, then any proceedings which may have been started under the Tax Recovery Act will be stopped.

But if the land owner after having entered into this agreement fails to keep his part of the contract, then the proceedings which had been started will be in force again.

If there is anything in this that you do not understand see your Councilor or come and see me and I will be glad to explain everything to you.

All applications to enter into this agreement must be made before December 16th, 1931.

BLAKE H. GREEN, Sec.-Treas.
Municipal District of Kinsella, No. 424.

WEIR ANNOUNCES WORLD GRAIN SHOW POSTPONED 1933

Regina, Oct. 2nd.—The world's grain exhibition and conference, which was to have been held in Regina in 1932 has been postponed until 1933. Announcement to this effect was made Thursday night by Hon. Herbert Weir, federal minister of agriculture and chairman of the national committee of the grain show, after he had received resolutions from the council of the Regina board of trade, and the board of directors of the Regina Agricultural and Industrial Exhibition association, urging postponement for a year, rather than its cancellation.

Mr. Weir Thursday night said he was in complete accord with the terms of the resolutions and favored the postponement of the world's grain exhibition and conference for one year.

More than two-score countries were expected to take part in the Regina world's grain exhibition and conference, plans for which were started two years ago. Exhibits of all varieties of grain had been promised from many European countries, from Asiatic countries, Australia, and New Zealand, United States and all provinces in Canada.

MONDAY IS A HOLIDAY

Monday, October 12th is to be observed as Thanksgiving Day. All stores, business places and schools will be closed all day. Do your shopping on Saturday.

I would as lief poison people as tell untruths about them.—Bishop Woodcock of Kentucky.

NEWS ITEMS FROM KINSSELLA DISTRICT

Mr. and Mrs. E. C. Williams motored to Edmonton last week and spent a couple of days.
Mr. William Anderson of Edmonton spent a couple of days at Jamieson's camp here.

The anniversary services will be held in the United Church here on Sunday, October 18th. Mr. Wilson of Edmonton will be the speaker on that day and on Monday evening, October 19th, a chicken supper will be held in the basement of the church from 6 p.m. to 8 p.m. Admission 25c. A good programme will be given in the church after the supper.

Mr. B. Wichter spent the week end in Edmonton.

A tennis tournament was held here on Saturday afternoon, Jarow and Kinsella teams, the Kinsella team won.

Mr. Arthur Lamdon of Edmonton arrived on Wednesday to take charge of his threshing outfit.

Threshing is the order of the day around here and considerable grain is being brought in to the elevator.

AVONGLEN NEWS

Avonglen Jr. U.F.A. held their regular meeting on Saturday, October 3rd. Twenty-two juniors being present, practicing and singing took up the time after the business of the meeting was finished. Misses Angeline Craig and Margaret and Anne Walker served a delicious lunch. One new name was welcomed to the roll, that of Miss Dutton. The next meeting will be on the first Saturday in November, however there may be some practice meetings before that date. Members will be informed they will take place.

Owing to the rains delaying threshing, Mrs. Harper will be unable to have Avondale U. F. W. A. meeting on October 15th as was given out, and unless further notice is given the meeting will be on October 29th instead, at Mrs. Harper's home at 2 o'clock.

Mrs. Ashton returned to her home at Fort Saskatchewan.

S. M. New and R. L. Shotts were among the fortunate ones who finished threshing Monday before the rain. J. Sawdon returned to Irma this week.

Cynthia Nottingham is assisting at the Allen home during threshing.

Mr. and Mrs. L. Hager have returned from Edmonton where Mrs. Hager has been in the Royal Alexandra hospital undergoing treatments. She is somewhat improved.

Wedding Bells

SCOTT-LARSON.

A quiet wedding was solemnized at the United Church, parsonage, Wainwright, at 2.30 Saturday, October 3rd, 1931, by the Rev. W. J. Huston when Beale Hill, eldest daughter of Mr. and Mrs. John L. Scott, of Kinsella, became the bride of Mr. Richard O. Larson, son of Mr. and Mrs. R. A. Larson of Irma.

The bride was attended by Miss Harriet Macfarlane of Redina, and the groom by his brother Mr. H. A. Larson of Irma. The only guests were Mr. and Mrs. J. L. Scott Kinsella, and Mr. and Mrs. and Mrs. R. A. Larson.

Mr. and Mrs. Larson will make their home near Irma. A host of friends wish them happiness in their new venture.

COMMUNICATION.

Edmonton, October 3rd, 1931.

Secretary-treasurer,
Irma, Alberta,
Dear Sir:

An individual who is in the Isolation Hospital here with smallpox gives a history of having been in Irma during the week ending September 26th. The onset of the disease had already set in and the macular rash developed on September 27th. He visited all the stores.

This information is offered that your Health Officer may be on the watch for any cases whose onset symptoms suggest smallpox. Any individual who has not been successfully vaccinated in the past five years would be well advised to have himself vaccinated.

Yours very truly,
A. C. MCGUGAN, M. D.
Director of Division of Communicable Diseases, Department of Health Province of Alberta.

WEEKLY REVIEW PROV. MARKETS

BEEF—On the Edmonton market prices have held steady, while the demand has been fairly brisk, with offerings light. Choice heavy steers sold at \$4.25 to \$4.50; choice light \$4.50 to \$4.75; good \$4.42 to \$4.50; \$3.25 to \$3.75; and common kinds \$2.50 to \$3. Choice heifers sold at \$4.25 to \$4.50, with good stuff making \$4 to \$4.25.

FEEDERS, STOCKERS—In this market there has been active trading, with offerings only fair. Feeder steers made \$3 to \$3.75; stock steers \$2.50 to \$3.50; stock heifers \$2.50 to \$3.50; and stock cows \$1.75 to \$2.50.

HOGS—On the Edmonton market bacon offerings made \$14.15 to \$14.25, fed and watered basis this week, while select brought \$4.00 to \$4.75, and butchers \$3.60 to \$3.75. These quotations are higher than last week.

SHEEP—Quotations on the Edmonton market were steady this week, with yearlings selling at \$3 to \$4; ewes at \$1.50 to \$3, and lambs from \$4.50 to \$5.50.

POULTRY—Very few real good birds being offered. Young stuff neither chicken nor broilers, while fowl are rough owing to moulting. Prices unchanged, but market undertone decidedly weak. Lower values expected once harvesting is over and movement commences.

EGGS—Prices steady, with extras, 21c; firsts, 18c; seconds, 10c; cracks 7c. Few pullet eggs arriving and these will no doubt increase, but offerings so far very light. Demand fairly active.

HAY—Offerings from country points light now that harvesting has been resumed. Demand not overactive and not expected to develop until first cold spell arrives. Prices steady with timothy, \$12 to \$13, and upland \$9 to \$9.50 per ton.

FEED OATS—Quotation steady at 23c to 25c, with most sales being made at the former price. Demand not very active.

NOTED YACHTSMAN, SIR THOMAS LIPTON, IS DEAD IN LONDON

London, Oct. 2nd.—Sir Thomas Lipton died here Friday night.

The 80-year-old yachtman became gravely ill from the effects of a chill contracted several days ago and Thursday—Thursday was reported near death. He was then given "a sporting chance," however.

He died on Friday, peacefully in his sleep, with several old friends at the bedside.

Sir Thomas Lipton was, possibly best known on this side of the Atlantic by his efforts to lift the American cup, emblematic of the yacht racing championship of the world.

Five times Sir Thomas crossed the ocean with his famous Shamrock boats in an effort to get the cup, but five times he failed. His smiling, good-natured manner in which he took his defeats, resulted in a popular subscription in the United States to purchase him a cup, and it was given to him together with a statement that he was the "world's best loser."

A National Disgrace

With the advent of the first few chilly nights this Fall, the newspapers once again begin the gruesome task of printing reports of fires with their records of tragic loss of life, terrible sufferings and enormous loss of valuable property, caused, in the vast majority of cases, through downright carelessness and disregard of the most obvious dictates of common sense. In the first week following a drop in temperature the papers reported case after case of explosion, fire, and death following the improper use of kerosene in staving fires in stoves. Yet people will persist in this highly dangerous practice.

Despite all the efforts of Government and municipal departments and officials, reinforced by those of insurance companies, the fire loss in Canada mounts steadily higher. Computed in dollars and cents alone Canadian fire losses in 1930 totalled over \$46,000,000. This does not take into account the loss of 237 lives, nor the expenses entailed for doctors, nurses, hospitals for a much larger number severely injured. It does not include the enormous expense to which every urban community is put in maintaining elaborate and costly fire-fighting equipment, nor the excessive insurance premiums which every owner of property is called upon to pay because the fire risk in Canada is so hazardous.

People today complain of depression, hard times and business losses, yet Canadians remain undisturbed over a condition, largely preventable, but which is levying a direct money toll upon them of millions of dollars a week. If because of hard times and consequent inability to pay rent or meet mortgage payments, an average of three families a day were thrown out of their homes, a vigorous protest against heartless landlords and mortgage companies would be heard throughout the land, yet, according to recent figures made public, an average of three families were made homeless by fire in Saskatchewan alone every day in 1930, and the figure is even higher for the first half of 1931.

The figures are positively startling. In this one Canadian Province, (Saskatchewan), between January 1, 1930, and July 31, 1931, no less than 1,679 dwellings, 579 stores, 610 barns, and hundreds of other buildings were destroyed by fire. And hardly a protest is heard!

And this terrible loss, which is being duplicated proportionately in all other Provinces, and which is going on at a time when the demand is being made to reduce legitimate expenditures all along the line, lower wages, eliminate all waste and extravagance, is largely preventable. This great loss, which, if saved, would more than provide for all necessary relief works throughout the Dominion, is the direct result of carelessness and reckless disregard of obviously dangerous conditions.

The work of education along lines of fire prevention must go on. It must be attempted on a scale hitherto unknown. It is gratifying to note that, in Saskatchewan at least, a well-organized campaign is being inaugurated among all school children, one designed to capture the imagination and assure the interest of all children.

But is fire prevention campaigns and propaganda sufficient in themselves? In the past they have not been. The question arises, therefore, whether the time has not come in Canada to have an official inquiry into every fire that takes place, ascertain the cause and fix the blame, and, coupled with this, to make it an offence under the law for any person to have a fire from other than natural causes, such as lightning, and made liable to a fine and subject to the payment of damages for any resultant loss to other people's property?

If the tenant or owner of a house was liable to a fine if a fire occurs because of a dirty chimney, defective wiring, accumulated rubbish, or other preventable cause, and made to pay the costs of the fire department in extinguishing the blaze, and forced to make good any loss sustained by a neighbor because of his carelessness, then, possibly, a good many now very careless and thoughtless people would exercise more care.

And why, it may be asked, should the careless householder from a fire protection standpoint, be immune from the payment of penalties for his carelessness any more than the careless automobile driver, or industrialist, who neglects to provide safeguards for his workmen?

The fire loss in Canada is a national disgrace, as well as constituting a huge annual national loss we can ill afford to suffer, but more importantly,—drastic if necessary,—be done to not merely remedy but remove this evil.

Canada In England

Dominion Took Prominent Part In Annual Exhibition Held At Bristol

A prominent part taken by Canada in the annual exhibition at Bristol, England, held from September 3rd to 10th. A Canadian section was organized consisting of the Government stand and individual booths occupied by private Canadian firms, according to an announcement of the Department of Trade and Commerce. The back-ground of the Government display is a large industrial map of Canada illustrating the points of production of many products exported to the United Kingdom.

Where Man Falls

There are fifty million flood victims starving in China while the granaries of Canada and the United States are bursting with millions of bushels of wheat for which there is no market. The people will likely go on dying and the wheat will continue to bulge the bins in which it is stored. Such is the world's system of transportation and distribution in emergencies.

Could Not Check the Summer Complaint

A Few Doses Did It

Mrs. R. Coulter, 318-11th Ave. E., Calgary, Alta., writes:—"The summer my young son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very worried. I could not get the discharges checked, so I went to the drugist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first dose I noticed the discharges were being checked, and it was not long before he was well again."

Subnursing As A Cure For Tuberculosis

Doctor Has Recently Introduced This Method In Vienna

Subnursing the inside of one's lungs to cure tuberculosis is a procedure introduced in Vienna, by Dr. Alexander Cemach, inventor of ultra-violet rays.

Dr. Cemach recently developed a device for treating hay fever and other nasal irritations by the application of these rays to the inside of the nose. To use his still newer device for treating tuberculosis, spots in the lungs affected by the disease first are located exactly by a series of X-ray photographs. A skillful surgeon then introduced into each of these infected spots in turn a narrow, bent rod, passed in through the throat and having at its end a tiny quartz lamp supplied with electric current, through wires, inside the rod.

Once properly in place, this quartz lamp is lit electrically for a few seconds or minutes. A powerful beam of the ultra-violet rays, like those in sunlight, thus is produced inside the diseased part of the lung. The germs of tuberculosis are killed easily by these rays, which is the reason sunlight is so good a disinfectant against them.

Many of the living germs in an infected lung thus are killed. Dr. Cemach believes, by the internal ray as provided by his instrument. Even if some of the germs are protected by the lung tissue enough are killed so that the natural germ-fighting force of the body can dispose of the rest.

Treatment by the instrument is now under comprehensive trial in Vienna, especially for the kind of tuberculosis sometimes called "galloping consumption," which progresses rapidly and often fails to yield to ordinary methods of treatment.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the color of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing, tinting, I always use Diamond Dyes. They are the most economical ones by far because they never run out. They make you look better than when redyed with ordinary dyes. They never run out, streak, or run. They go on smoothly and evenly, when in the hands of even a child. Another thing Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They are, Quebec, be called 'the world's finest dyes'."

S.E.G., Quebec.

The Safest Conveyance

Toronto Proves Accidents To Street Cars Are Rare

Although seventy-one were injured in a street car wreck at Windsor, Ontario, the fact remains that a street car is just about the safest place to be while on a public thoroughfare. Since taking over the Toronto railway in 1921, the Toronto Tramway Co. had collected, up to the end of 1930, more than 1,775,000 fares on its city system, and the number, together with fares on the coaches, etc., is now in excess of 2,000,000,000. Yet not one passenger has been killed while riding on a street car or bus. It is a fine record.

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to her children. To the child, a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little gentle rubbing and it is absorbed by the tissues, making the skin truly rose-leaf in texture.

Frozen Strawberries

New Process For Packing Adopted By B.C. Growers

Frozen strawberries and other small fruit will be shipped from Vancouver Island in steadily increasing volume, following the adoption of a new process for packing, in the opinion of Captain P. Livesey, manager of the Saanich Fruit Growers Association, who expects that the plan will absorb a large part of this year's surplus. A company has been formed with a capital of \$75,000, and with the growers as chief stockholders, which expects to handle at least 30 tons of strawberries and loganberries this season.

And Now

Visiting Nurse—"And do your children use a toothbrush regularly?" Fond Parent—"Do they, mum? First thing when they get up in the morning, it's a race to see which one can get to the toothbrush first!"

Masks of living faces can now be made by a method which preserves the human features, exactly as they are in life.

W. N. U. 1910

IN BED WITH BACKACHE

"Two years ago I suffered with severe pains in the small of my back, which would disappear and last myself upright. At times I had to go to bed for a week at a time. I went to and from hospital for 3 months, and they certainly did me good, but they told me they could not keep giving me medicine, but that I needed complete rest for 6 months, away from the children. I could not bring myself to be parted from the children, so I did not go to hospital any more. I started using Kruschen Salts and have had no trouble with my back since."—Mrs. W. Kruschen contains vital salts that go right down to the root cause of backache. Soon after you start on Kruschen, the sharpest pains of backache cease. As you persevere with the "little daily dose" the twinges become less and less frequent, until finally you hardly know what an ache or pain is. Then, if you're wise, you'll prevent the possibility of a relapse by continuing the tiny, tasteless pinch of Kruschen every morning.

Was Dangerous Trip

Wilkins Returned Because He Considered Conditions Too Risky

One day after Mr. George Hubert Wilkins and Arctic exploring ship, "Nautilus" had for six days ceased communication with anxious radio stations, his pretty wife exclaimed in London: "I have a hunch tonight will bring good news."

News which came was that the "Nautilus" lay floating amid ice debris north of Spitzbergen and about 400 miles from the North Pole. Ice had broken off the submarine's diving fins. Nonetheless Sir Hubert had water-filled her diving chambers, and nosed under vast cakes of ice. When she first scraped under, the hollow steel hull, Wilkins reported, "was a veritable drum or sound box with the faintest scratch of the ice sounding like the ripping of giant strips of calico. Heavy pumps set up tremors like the continuous shocks of earthquakes."

The crew quickly recovered from first fright, looked out the portholes. They saw "icebergs of ice, moving stealthily through the water, which changes in colour 'blue'."

They saw prawn-like and cockroach-shaped creatures, sea fleas, medusa jelly fish. Through compression chambers they took samples of water and icebergs. They saw the rammed their ice-borer, which was to give them escape if they were gripped under ice, against an ice chunk and smashed it. Ice crushed the runners into the "Nautilus," which was able to slide against the underside of ice fields. She sprang two leaks, became miserably dank within. The propeller edges became saw-toothed and bent, grinding against small ice. But at last the "Nautilus" emerged from the ice-mashed Arctic and Sir Hubert radioed the world that he was all right.

William Randolph Hearst, for whose publications and news service Sir Hubert has been reporting the submarine excursion, wireless him a plea: "I must urgently beg of you to return promptly to safety and to defer any further adventure until another and more favourable time, and with a better boat."

Sir Hubert replied that it had really become too risky to venture further north. Regrettably he was returning to Spitzbergen. Norwegians recalled "planes and ships en route for 'Nautilus' rescue, and voiced their vexation at the expense which troubled explorers cause other people. It was suggested that henceforth all Polar expeditions be required to post enough money to pay for rescue expeditions.

Up To The People

All the Government measures in the world cannot create prosperity, says the London Daily Express. They can break down barriers. They can clear the channels. But in the end the manufacturers, the worker, the wholesaler and the retailer must carry the responsibility on their shoulders. Leave government to the Government. They are quite adequate to the present emergency. As for the rest of us, let us get on with our jobs—and begin today.

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passages tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily benefiting cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

The Three Essentials

In order to obtain the greatest possible returns from the pullet flock, three essential things are: Good heavy, vigorous stock and proper winter quarters. It is during the winter months that the greater profit is made because of the higher price of eggs.

The Changing Conditions

Now Passing Through A Phase the World Has Never Before Experienced

The methods and habits that are now rapidly spreading over the world are not those produced by the industrialism of the nineteenth century, but those arising directly out of the advances made in a single generation, contemporary civilization being barely twenty years old. The world of today is what it is, not because of the industry and invention of which steam and the railway were the governing forces, but because of electricity and motor transport, the airplane, the cinema, the radio. These influences came into social operation with extraordinary swiftness, and their conquest of the whole world will now be a matter, relatively, of a very short period. The life of all mankind becomes directly affected. The relations of governments and peoples, money, manufactures, and crops, standards of living, the worker's food and leisure, his children's education and his wife's domestic day, all are going through a rapid and thorough transformation the like of which has never been known on earth.—New Statesman and Nation.

Save On Pensions

Decision Of Federal Government Will Assist Alberta

Savings at the rate of \$250,000 a year will be made to the Alberta provincial treasury by the decision of the Dominion Government to take over 75 per cent. of the old age pensions payments, advice of which has just been received from Ottawa.

The new arrangement will date from July last. It will involve a revision of the agreement between the provinces and Dominion, but this, it is stated by Premier Brownlee, will be only a formality and will be attended to at once.

The division of the responsibility for old age pensions, as between the two governments, has heretofore been on a fifty-fifty basis. Alberta's total budget for the purpose being \$1,000,000. On this a saving of 25 per cent. will now be made to the province.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

Giant Airship Tested

The U.S.S. Akron Carried 113 Passengers On Trial Trip

The U.S.S. Akron has been taken upon her first flight and came down safely at Akron, Ohio, three hours and 47 minutes later.

The flight was the first test for the world's largest dirigible, built here for the United States navy, and the Akron went through it in a manner highly pleasing to navy officials. The ship carried 113 men, the most ever carried in the air in the United States and believed by navy officials to be the largest passenger list of any airship in the world.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowls do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective, for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

Railway Accidents

One Hundred and Ninety-One Mishaps During the Month Of June, Report States

There were 191 railway accidents during the month of June, a report issued by the Board of Railway Commissioners for Canada shows. Twenty-five persons were killed and 183 injured in these accidents, besides which there were 11 persons killed and 31 injured in 24 railway accidents at highway crossings.

Ontario led with 16 crossing accidents; Quebec had five, New Brunswick two, Nova Scotia one, and the rest of the provinces none, during the month. Of the 24 accidents, six occurred at protected and 18 at unprotected crossings. Twenty occurred during the day and four at night.

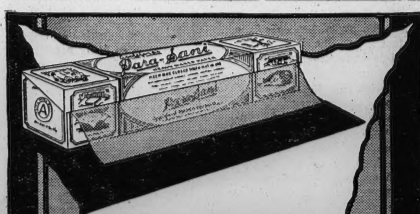

A Powerful Locomotive

The most powerful locomotive of its kind in cylinder type engine, left Smith Falls recently for Montreal, drawing a freight train of 96 cars of grain, a dynamometer and a van weighing 8,123 tons, the whole train being a mile in length. It arrived at its destination the same day when the grain was unloaded for shipment overseas.

Thirty-six tons of strawberries were carried by aeroplane from the Netherlands to London in May.

Saskatchewan Sodium Sulphate Deposits Are Fast Becoming Of Major Importance To Province

One of the most interesting and important developments of mining in Western Canada recently, says the Manitoba Chamber of Mines, has been the activity in connection with the big sodium sulphate deposits of Saskatchewan. Once looked upon as "alkali sloughs" of no economic value, these Saskatchewan deposits are already becoming of major importance. Shipments in 1930 totalled 31,571 tons valued at \$293,847, compared with 5,018 tons valued at \$64,112 in 1929.

The Horseshoe Lake Mining Company at Ormiston, the principal producers, are shipping their sodium sulphate to the International Nickel Company's plant at Copper Cliff and to the sulphate-pulp mills. The Horseshoe Lake deposit is estimated to contain over 9,000,000 tons. Shipments average almost three cars of sodium sulphate per day; and, in addition, besides other supplies, the operation requires the use of three carloads of coal per day, the coal being used to drive off the moisture content.

In 1929 imports of nitre cake used in nickel refining in Canada amounted to 80,900 tons. It would require 45,000 tons of the natural sodium sulphate from Saskatchewan to manufacture this quantity of nitre cake. In addition, in 1929, salt cake consumed by the pulp and paper mills totalled 44,822 tons. It appears probable, says same authority, that in 1931 much more of the pulp mill requirements will be supplied from Saskatchewan deposits.

The development of the "alkali sloughs" of Saskatchewan dates from the time of the war, when there was an exceptional demand for new sources of potash. Investigations carried on at that time demonstrated that there was an abundance of sodium sulphate. The market for this product has been successfully developed in recent years, and the sales field is increasing. Sodium sulphate was first used as a medicine under the name of Glauber Salts. More recently demand has arisen for it in a number of industries. These include the making of kraft paper, the refining of nickel, the manufacture of window and plate glass, the dye and textile industries, tanning preparations, electro-chemistry and electro-plating.

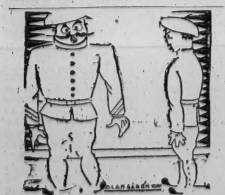

Some of the more important deposits of sodium sulphate listed in a review of the situation by the Manitoba Chamber of Mines are the Horseshoe Lake deposit, the Muskiki Lake deposit and the Frederick Lake deposit. It is estimated by the Chamber of Mines that there are very large quantities of sodium sulphate available. Deposits lend themselves to ready measurement and those gauged to date total over 100,000,000 tons. Considering the other large number of known, but as yet unmeasured deposits, there is not much question that Saskatchewan has at least 250,000,000 tons. Many fine individual occurrences running from 3,000,000 to 4,000,000 tons up to 10,000,000 and 15,000,000 tons are within easy and economic access.

Butter Exports Grow

Heavy Increase In Amount Of Butter Exported Is Shown

That Canada is definitely on an export market basis in so far as butter is concerned is increasingly apparent with each succeeding issue of the market report of the Dominion Dairy and Cold Storage Branch. Exports of butter so far this season, since May 1, total 105,452 packages as compared with 3,068 packages for the corresponding period last year. Also evident is a swing of butter-fat from cheese to butter. Cheese exports last year, May 1 to August 29, 1931 totalled 349,100 boxes, as compared with 374,487 boxes for the same period last year.

The turn of a woman's head often turns a man's head.

"How can you have the nerve to look me in the face?"
"Well, sergeant, one can get used to anything."—Gutierrez, Madrid.

W. N. U. 1910

Was Once Called "Shaddock"

Captain Of That Name Discovered Grapefruit In Polynesian Islands. Grapefruit, which some "low down" columnist might refer to as a "juicy" topic of discussion, is certainly gaining a place in the world. Shipments of grapefruit to Great Britain and Europe were recently reported to be making strong gains each year, while on this continent it is said to be a strong rival of the orange at breakfast time.

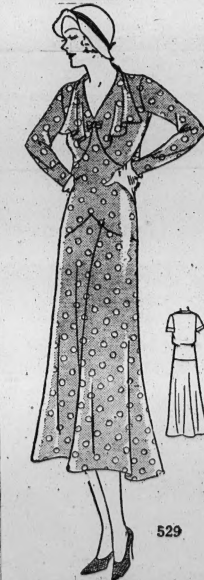

As it happens the grapefruit has no more to do with, or is related to, the grape, than the man in the moon is to Limburger cheese. Its original name was the "shaddock," after it was discovered by George Shaddock in the Polynesian Islands. Because it grows in clusters, and for no other reason, it was forced to get along under its present title. Horticulturists having been trying in vain to rechristen it "pomelo."

Back in 1909, 1,000,189 boxes of the fruit were grown. In 20 years the number increased to 9,218,000 boxes. A native of the East Indies, it was brought to the West Indies, Florida and California, and has spread to Arizona and Texas. California has 9,000 acres of bearing trees. Arizona has 2,830 acres, Florida has 75,000 acres, while Texas, the State of all derricks, has 10,192 acres of bearing orchards. Each State has many trees, non-bearing, as yet.

Grapefruit indeed, it might be said, is getting more and more in the public eye!

By Annette

NEW SLENDERING LINES PROVIDE SMARTNESS AND MUCH CHARM

It is a crepe silk print in rich burnished shade. The neckline is unusually smart. And note the upward pointed treatment of the bodice and hipline seaming.

It's as simple as falling off a log to make it.

Style No. 529 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 2 1/2 yards of 39-inch material.

Black crepe satia would be just splendid for this model.

Then too, you'll like it in supple woolsens.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Trade Ship From Canada

Will Leave Halifax In January On Trip To West Indies

The West Indies were the first islands sighted by Columbus in his voyage of discovery in 1492. For years writers have made them the scene of tales of piracy and adventure and in more recent times of stories of voodooism and romance. When, however, the S.S. New Northland, sails from Halifax on January 8, 1932, the passengers will not be going in search of romance or buried treasure, but will endeavour to seek treasure of a more practical kind in the form of increased trade for Canada and more friendly relations between this country and the smaller units of the British Empire which they will visit.

The Canadian Manufacturers' Association, the Canadian-West Indian League and the Clarke Steamship Company are co-operating in organizing the cruise to Bermuda, the British West Indies, British Guiana, the Bahamas and Cuba.

The lounge of the ship will be divided into booths for the exhibition of Canadian manufactured goods and other produce of this country. Further space for exhibits will be provided between decks and in the state-rooms.

The cruise will occupy almost two months and between the time of leaving Halifax and the date of return, March 4, 13 ports will have been visited. At none of these ports will the party remain less than one day and at Kingston, Jamaica, the ship will be in the harbour for four days.

In addition to the organization sponsoring the tour, support is being given the undertaking by Boards of Trade and Chambers of Commerce throughout Canada.

King Crowned Annually

Ceremony Observed Every Year, Before People In Uganda

The native king of Tene, Uganda, was recently crowned. But he is not a new king. The coronation is an annual event. The ceremony takes place on top of King's Hill, where King George Rukidi meets his chiefs and people. The king, who has visited England and been received at Buckingham Palace, is 6 feet tall. The king's coronation robes include a great cowrie shell headdress, with a long, silky-white colubus monkey skin beard attached. On top of his enormous headdress is placed the actual crown, which is a small reed cap. The most impressive part of the ceremony comes when the King walks alone to a small hut, before which, amid silence, he stands motionless and looks across his country for three minutes. After the ceremony the King changes into a European suit, and the Princess and the Queen Mother receive European visitors, while the King talks in English to his guests and a football match proceeds outside.

The only absolute monarchies are the Empire of Abyssinia, the Kingdom of Siam and the Empire of Morocco.

There are about 7,280 hospitals in the United States. Of these 700 are in New York State.

The Present Cataclysm

World Is Passing Through No Ordinary Trade Depression

It is now two years since hard times reached this country, and it is no longer open to serious question that we are in the midst, not of an ordinary trade depression, but of one of the great upheavals and readjustments of modern history. A dozen governments have been brought down by it. In all the five continents it has upset the normal expectations of men by which they had been planting and making, buying and selling, borrowing and lending. In all the vast confusion which has resulted one thing at least is certain—the world, when the readjustments are made, can not and will not be organized as it was two years ago. The post-war era of the Nineteen Twenties is over and done.

As individuals living through this tremendous experience most of us know this with our heads and feel it in our bones. But as a people, in our corporate capacity, we have not yet begun to acknowledge the reality of the change and to formulate our national purposes for dealing with it. As a nation we continue to stand just where we stood two years ago, refusing in any responsible fashion to consider whether the increasing political insecurity of the world (which is reflected in mounting armaments), the increasing obstructions to trade, the desperate complications of debts and reparations, are a probable foundation for the restoration of prosperity.

Thus far our national response has been to stand pat in all such matters, and its belief that in sixty days, ninety days, or six months, the dove would return with the olive branch, the flood would recede, and business would go on as usual. — Walter Lippmann, in the New York Herald-Tribune.

Soldier Settler's Victory

Awarded Alberta Championship For Best Field Of Grain

Peace hath her victories no less renowned than war, as James Hazlett, of Balmoral, near Red Deer, a former Canadian soldier in the Great War, has demonstrated. He has been awarded the championship for the Province of Alberta for this year's best field of standing grain.

The prize-winning field was ten acres of Marquis wheat grown on breaking, and it was first entered in the Field Crop Competition of the Red Deer Agricultural Society, where it won first prize. It is expected to yield 50 bushel to the acre. This year Hazlett had 777 acres in crop of which 610 acres were sown to wheat.

New Glass Is Flexible

A flexible glass has been invented in Europe. It is made largely from vegetable products. It has every appearance of genuine glass and does not look in the least like celluloid, yet it is said a sheet of it can be rolled up as easily as a piece of stiff paper, and it can be dropped or twisted or bent without injury.

"A bachelor has left his fortune to a woman who refused him."

"And then you say we men are not grateful."

WILL FILM THE AURORA BOREALIS

Photo - Canadian National Railways.

Three explorers and scientists, representing the United States Government, arrive at Churchill. Equipped with motion picture cameras possessing an exceptionally high rate of speed and with films sensitive to the colors of the spectrum, they will film the Aurora Borealis, as a preliminary to the scientific investigations of Arctic atmosphere phenomena which will be conducted next year by parties sent by all nations interested in Arctic exploration. In charge of the party is Capt. Flavel M. Williams (on steps). His companions are (left) A. Louie, assistant scientist and camera man, and (right) Robert Marshall, color expert. At Manitoba's ocean port they found an additional interest awaiting them in the loading of the first grain cargoes. They plan to photograph the events of this historic occasion in true colours.

Meat Packing Enjoys Rating As One Of Leading Manufacturing Industries Of The Dominion

Hard Work Not Responsible

Increase In Egg Production Due To Better Hens

"The Canadian Government Information Bureau falls into a regrettable error," declares the New York Sun, editorially, "when it says that hens in Canada are working much harder than they did ten years ago. It basifies this unfortunate declaration on the fact that the average egg production of 6,010 hens in 1920 was 122.1 eggs, while in 1930 it rose to 178 eggs for each bird."

"The fact is that the 1930 hens are better bred than the 1920 hens were. The flocks have been improved by persistent, intelligent culling. The hens of non-productive strains have been reduced in number; the good layers have been increased in number. Year after year the breeders have competed for higher marks, and the eggs of their prize-winning and prize-deserving pens have been eagerly sought by poultry men."

"As the better hens became more numerous the number of eggs to the hen rose, but this does not mean that the hens of today work harder than their ancestors did. They merely live up to the more widespread barnyard understanding of the fact that to make a flock profitable its members must lay an average of 150 eggs a year each, and the contemporary Canadian hen, conscious of their responsibilities as key workers in a great and profitable industry, make play of their task, knowing not the meaning of the phrase 'hard work.'"

Experiment To Be Tried

Province Of Alberta Decides To Attempt Strip Production

"Strip farming" as a means of moisture conservation will be tried out extensively this year on the Alberta Government Farm at Youngstown, according to J. F. Andrew, assistant deputy minister of agriculture. Alternate strips, ten rods in width, will be seeded to summer-fallow, and the following year the strips cropped this year will be fallowed. The strips on which the crop is growing draw a considerable amount of soil moisture from the resting land; the stubble strips during the winter check soil drifting, and the necessity of keeping the whole field fallowed every second year is avoided.

A special four-year rotation, including oats, sweet clover, summer-fallow and wheat is also being undertaken as an impetus to mixed farming and live stock production in the so-called dry area of the province.

Will Train Girls

For Domestic Service

Calgary Proposes To Establish School For Unemployed

A domestic training school for unemployed girls will be established here shortly, according to plans announced by the unemployed girls' committee. The proposal is said to have the support of Government authorities and financial aid from both Provincial and Federal relief funds is anticipated.

The committee pointed out that domestic service is almost the only field where girls can still find employment, but many of these who were formerly in stores, offices and factories without knowledge of cooking and cannot give satisfactory service.

By providing a body of highly-trained girls, the committee believes wide benefits will be realized both by higher earning capacity and in later life, when the girls have homes of their own.

New Glass Is Opaque

Glass that is opaque from the outside recently was demonstrated in the windows and windshield of an automobile. Passengers and driver can see perfectly from the inside of the car, but the appearance from the outside is that of a mirror. The only difference from ordinary glass from the inside is a slight bluish tinge.

Where the Money Is

Who says the people are short of money? At the close of the month of June there were more than \$24,200,000 to the credit of depositors in the Post Office Savings Bank and deposits all but equalled withdrawals during the month in question. Much the same story is related by other savings banks.

Going out to hunt for butter is an ordinary experience in Trinidad, where the natives catch fat young "oil birds" and melt down a supply of butter.

Slaughtering and meat packing is one of the leading manufacturing industries of Canada. It ranks second in the list in order of value of production and is preceded by the pulp and paper industry only. On the basis of the value of materials used it comes first in the list. There were 76 slaughtering and meat packing plants in operation in Canada last year, which was an increase of two over 1929. Production last year, however, was lower than in 1929, which was the record year in the industry since the post-war boom.

The value of production of the slaughtering and meat packing industry in 1930 was \$185,842,902, while the value in 1929 was \$185,842,902. The capital invested in the industry in 1930 amounted to \$60,778,996, of which sum land, buildings and machinery accounted for \$32,798,585, materials, products and supplies on hand for \$15,442,178, and cash and accounts and bills receivable for \$12,538,233.

The number of animals slaughtered in Canadian plants in 1930 was 3,987,819. Of these beehives numbered 627,135, sheep and lambs 758,170, hogs, 2,206,630 and calves, 385,884. The dressed weight of the animals slaughtered amounted to 724,024,410 pounds and the cost value to \$104,815,270. Decreases from the preceding year were shown in the number, weight and value of beehives and hogs slaughtered, while increases were shown in calves. Increases are reported in the number and weight of sheep and lambs slaughtered but there was a decrease in the cost value. Dressed meat purchased by the plants in 1930 in a fresh or partly cured state amounted to 70,338,745 pounds valued at \$11,011,881, and the poultry used showed a total of 6,240,959 pounds with a value of \$1,468,538.

The main centres of the slaughtering and meat packing industry in 1930 was in Ontario, where 24 establishments were operating. In the Province of Quebec the number was 17; British Columbia had nine, New Brunswick, eight, Manitoba and Alberta six each. Saskatchewan, three, Prince Edward Island, two, and Nova Scotia, one. The plants generally are of large capacity, only 16 of them in 1930 having a product value at less than \$100,000. Establishments with a product value at from \$100,000 to \$1,000,000 numbered 23, while those with a product value at \$1,000,000 or over numbered 35.

The consumption per capita of beef and pork in the Dominion in 1930 is reported as being less than in 1929, while there was an increase in the consumption of mutton and lamb. The consumption of beef per capita last year is placed at 67.59 pounds, that of pork at 74.92 pounds, while that of mutton and lamb was 7.11 pounds. In the previous year the consumption of beef per capita was 68.13, pork 81.52, and mutton and lamb 7.03 pounds.

Silo Saves Surplus Crop

Can Be Kept For Years When Feed Is Scarce

A silo on a live stock farm may be helpful as a storage place for immature crops in poor crop seasons and as a storage for surplus crops in good years, according to J. B. Fitch, Kansas State College. Experience has demonstrated that immature crops dried beyond the stage of saving because of the lack of moisture can best be conserved by putting in the silo. In years of surplus roughage, a silo can be justified to hold silage over for lean years.

Frozen Fish Sent Across Canada

The first regular shipments following the experimental shipment of quick frozen fish across Canada, recently, comprising seven cars from Prince Rupert, passed through Winnipeg a few weeks ago over the Canadian National Railways enroute to the east for consumption, in the United States and Eastern Canada.

"Where is your licence to carry fire-arms?"
"With fire-arms am I carrying?"
"That cigar"—Hummel, Hamburg.

The Wastebasket

"I listened to you for half an hour last night while you were talking in your sleep," said a local lady to her husband the other morning. "Thanks, dear," he replied, "I wish you could show the same self restraint while I am awake."

If you think the job of postoffice clerk is an easy one, just test your brains on this one: "A young lady stepped into the postoffice here the other day and said as she handed the clerk a dollar: 'I want twice as many two cent stamps as one cent stamps for this, and give me the remainder in three cent stamps.' Can you figure it out?"

"I get such severe headaches lately, and the doctor says it might be some foreign substance in my brain," said a high school boy to one of the girls in the library last week. "Ah, an idea perhaps," she replied.

Heard at the poker party: "After all, if it wasn't for our wives, would any of us be where we are now?" "You're right! That's what poker parties are for."

"Hey, there, don't jam up the traffic. Use your noodle," shouted the local constable to a young lady who drove her car slowly down Main street Saturday night. "I didn't know, the car had one," she replied sweetly.

At a recent wedding in Holden a nervous best man proposed a toast to the bridesmaid as follows: "I wish to propose the health of the bridesmaids and to express the hope that they will soon be taking the place of the bride."

The trouble seems to be, says a careful observer, that sooner or later the most of us get what we deserve.

The difference between a man and a mule, says one of our philosophical married women, is that a mule never kicks without a reason.

"What, you ain't going 'down town shopping in this rain?" said a local citizen to his wife one day last week. "Why, certainly," she replied, "this is the first chance I've had to spend that money we've been saving up for a rainy day."

"I have a terrible cold, and my head seems all stopped up. I hardly know what to do," said a high school boy in the library Monday. "Have you tried a vacuum cleaner?" asked one of the girls.

"My daughter can sing, play the piano, act, paint, skate, dance, pilot an aeroplane, and drive a car," remarked a Toffield lady to her new son-in-law after the wedding. "Well, I don't know anything about cooking, darning, and housekeeping, but I can see where I'm going to have a chance to learn," he replied.

"That new bell in the steeple should attract more attention to the church," said one deacon to another in a neighboring town. "Not as much as the new bells in the choir," the other replied.

An Idaho man was fishing on Lake Crescent recently. He caught a big northern pike, the biggest he had ever landed in his long and busy life. Almost crazy with joy, he telegraphed his wife: "I've got one; weighs seven pounds and it is a beauty."

The following was the answer he got: "So have I; weighs ten pounds. Not a beauty—looks like you. Come home."

WANT ADS

WANTED—A piano to rent. Inquire at Post Office.

WANTED—Some good clean jam tins free from labels or printed matter. — H. W. Love, Irma.

STRAYED—From Section 23-45-9, with an Aberdeen-Angus Bull, branded TS on left neck. Weight about 1,000 lbs., age about 1-2 years. Anyone seeing same kindly notify Thos. W. Shaw, Irma, Alta.

FOR RENT—Two room house, opposite Farmers Mutual Lumber Co., in good condition. Rent \$7.00 per month in advance. — H. W. Love, Irma.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

NOTHING BUT GRACE OF GOD CAN SAVE WORLD SAYS BENNETT

Toronto, Oct. 2nd.—With ringing utterances of faith and confidence in the future, Premier R. B. Bennett here Thursday night declared that the issue before the world today was that of Christian civilization. Civilization had not failed; Christian religion must not go into the discard; and with supreme confidence, high courage and faith, the prime minister stated, we must look forward to the future.

The premier addressed the United Church missionary congress assembled in convention. Continuing, Premier Bennett stated the grace of God had saved England in the 18th century. "And," he declared, "I am firmly convinced that nothing but the grace of God will save this world."

CANADA'S FAMOUS RESORT

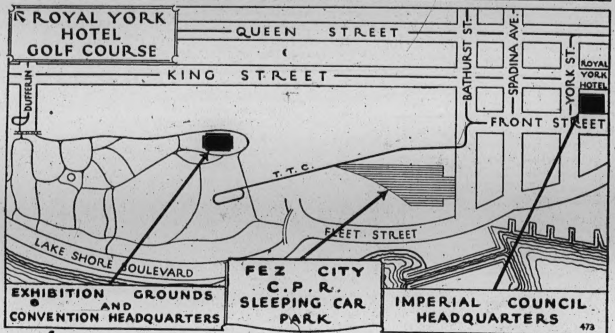

HOTEL CLOSING FOR SEASON Jasper Park Lodge, the famous hostelry in the Canadian Rockies, closed for the season September 30th. W. Pratt, Montreal, general manager of the Canadian National hotel system, who was in the west this week, told newspaper men he was more than pleased with the patronage the Lodge enjoyed, especially under present conditions. There were guests registered from virtually every state in the Union, and many from Great Britain. More Canadians, he said, were there than in former seasons. B. B. Davis, New York, the well known columnist, was among the notables on hand for the closing days.

BUFFALO MEAT TO BE SOLD TO CANADIAN HOUSEWIVES

Buffalo steaks, tongues and tails, delicacies which figured on the plainsman's menu in western Canada many years ago, will again be available for Canadian householders and for diners in hotels and dining cars of the Canadian National Railways, as an announcement from Ottawa says that another 1500 animals from Canada's great buffalo herd at Wainwright Park are to be slaughtered in the late fall and early winter.

At the end of March of this year there were more than 6,000 animals in the Wainwright preserve. To this number has since been added the annual increase of about 20 per cent, with the result that the park is again overtaxed as to its grazing possibilities and thinning out of the herd has been decided upon by the National Parks Branch, which controls the buffalo experiments. This is not the first time that it has been found necessary to reduce the Wainwright herd. On several occasions, large numbers of animals have been slaughtered and the products have been marketed.

Canadian Pacific Builds City

Ready and fully equipped to house a population of 3,000, "Fez City" is now being built by the Canadian Pacific Railway for the accommodation of the army of Shriners who will make Toronto their Mecca next June. Mainly, the city will be composed of sleeping cars, three hundred of which will be impressed into service while marauders will take the place of administration and service buildings. It will closely adjoin the exhibition grounds where the Shriners will hold their convention. Fez City will be fully equipped with a miniature hospital, restaurant, barber shop, shoe shine and even beauty parlors, news stands, cigar stands and candy counters. It will be cut in half by "The Midway" from which 1st, 2nd, 3rd, etc., streets will radiate, and "Rameses Drive" will handle all the motor traffic. Canadian Pacific and City police will co-operate in the protection of this new city. The cars will be arranged in the order that they will pull out for home at the end of the convention. The city will be brilliantly illuminated by electric light.

Your Needs In Printing

WHEN BUSINESS IS QUIET

When there is a quiet time as at present in usual business, a good chance is afforded merchants and others to check up their requirements for the year, place orders and have them completed in readiness for the hurry up periods. This is especially true of your printing and we venture to draw your attention to our well equipped plant.

Our stock of Paper, Envelopes, Cards, Card-boards, and all other items required in this business is complete.

An Ad Is an Invitation

Three Generations of Golfers

Golfers, like poets, are born, even though, unlike poets, they are also made. But when a six-year-old girl makes a par-four hole in seven including a drive across the Spray River, and when her mother at 17 was golf champion of Alberta, and when, further, her grandfather is the professional at the Banff Springs Golf Course—why then, you have to allow a little something for heredity. The above data cover the facts in the case of Lois Dalgleish, 6-year-old daughter of Mrs. Peggy Dalgleish and granddaughter of William "Bill" Thomson, professional at the Banff Springs Golf Course since 1910. "Start them young" is a good rule in any sport, but is particularly applicable to golf. Lois' mother began her golfing career at six but Lois herself commenced at four, when her grandfather purchased diminutive specially made clubs for the baby hands and spent hours of patient training with her—hours of spontaneously invented methods of teaching. The result is that a child of barely school age is doing what many adults and in fact many golfers cannot do, namely, making par four holes in seven strokes while her putting is beautiful to watch. Lay-out shows the spectacular drive across the Spray River which features the Banff Springs Golf Course; the three golfing generations; Lois swinging for the drive across the river; and Lois putting—true as a die.

VIKING

The five aeroplanes that comprised the air circus from Calgary put on by pilots from the Great Western Airways didn't live up to the advance notices as advertised on posters put up around town. Only a couple of the planes carried a few passengers in the afternoon, after which the circus called it a day. The next day they flew to Holden.

In the party were Capt. and Mrs. Jack Palmer, and pilots Joe Paton, Howard Sandgate and Ernie Kubelek. One of the planes was owned by Dr. Scott of Bassano.

Opinion is about evenly divided in this man's town in regard to the final outcome of the world's baseball series being played between the St. Louis Cardinals and Philadelphia Athletics. Old dyed-in-the-wool ball fans like Ben Runyon and Ben Gray are pulling strong for St. Louis, and are chuckling some mean chucks when they meet fellows like Slavik, Main, Graham, et al., who are strong for Philadelphia. On Friday the big battle will rage again at St. Louis. If the Cards win they will be the world's champs, but if the Athletics win, (and many are betting they will) another game will have to be played to decide the series. Well, it's a toss up at that, with St. Louey having the edge with one game to the good.

Fans have gathered at the N. C. Graham hardware, Broughton's barber shop and at other places where there was a radio and listened to an account of the games broadcast direct from the ball grounds, the broadcast coming via the Edmonton Journal station. Several small pools have been wagered on the outcome of each game which has added local interest to the series. Winners so far have been Geo. Loades (3 times), Bob McAtthey, Wm. McAtthey, Percy Finch, Max Stenger, and W. J. Brown.

The Rector paid farewell visits to Killiam when the Church was filled and many were the expressions of sorrow at parting. The Rector was reminded on all sides of the Mission he had conducted last winter and of the services he had conducted on various occasions. Last week the Rector spent a few days with his old parishioners at Entwistle, Evansburg, Seba, Beach and Tomahawk, the churches were filled and again sorrow was expressed at his having to leave Canada on account of health. They said they did not mind so much his going to Viking because they felt he was still not too far away and that they might see him occasionally, but that would not be possible when he was in England, and they would miss their "Little Minister." They told the Rector that an illuminated address was being prepared with the signatures of his parishioners so that he could hang it in his study at home and it would be a reminder of the loving friends he had left in Canada, they themselves would always remember him in the Church he had beautified at Entwistle and the beautiful Church he had been the means of erecting at Evansburg. St. Paul's church at Evansburg stands on the Jasper highway and is visited in the summer by a large number of visitors passing through and each and all remarked what a beautiful little church it was.

On Sunday, October 4th the Rector paid a farewell visit to Mooreville and the school was filled with worshippers. After the services a reception was held at the home of Mr. Fred Cottrell when the house was packed to overflowing. Afternoon tea was served by Mrs. Cottrell and friends and again expressions of sorrow were felt at the Rector's having to leave them for England, but that their best wishes would go out to him in the Motherland.

Messrs H. Rollans, C. G. Purvis, and Jas. Finnemore, members of Connaught Lodge A.F. & A.M. attended a district meeting of the order at Holden on Monday. Considerable difficulty was experienced in getting home in the rain, some of the Jarrow and Irma brethren spending the night in the ditch along the road west of town. That travelled highway can't get here too soon, if this wet weather is going to continue.

Thanksgiving Day, October 12th, will be duly celebrated with a grand dance in the large and magnificent Elks Hall, Viking. After a big turkey dinner it will be good to meet your friends and enjoy a social evening to the strains of a local orchestra that is preparing a program of dance music for the occasion.

The rain that fell Monday night is expected to hold back the harvest another week. Many rigs were turning up on Monday and prospects looking good for a long run.

Albert Gray shipped the first car of new wheat from the U. G. G. elevator that graded No. 2.

The monthly meeting of Quinte Ladies Auxiliary will be held in the Quinte School house on Saturday, October 10th.

NEWS FROM BRUCE AND DISTRICT

At the October meeting of the Bruce Women's Institute last Thursday afternoon the ladies decided to settle by informal debate, whether or no "Thin ladies are better home-makers than fat ones." The more slender affirmative accused their stout opponents of sacrificing energy to their avoidupis, and negative responded with a vigor that if their weight decreased their activity. It merely helped to keep them confined to home and wifely duties. Oddly enough the thin ladies were voted to have won.

Always alert to be of practical use in the community, the Bruce W. I. is taking a hand in a new forward movement. There are families with children of school age in the district in need of footwear and clothing and lacking the means to buy. A large hauled area has helped to make this problem acute. Co-operating with the municipal councils who are in some cases providing relief work to be paid for in groceries, the ladies have made the W. I. a clearing house for used footwear and clothing, particularly for the use of school children. A committee is now at work placing needed articles where they can be of most use. It is evident at present that the demand exceeds the supply. Donations of anything wearable will be received by any member of the committee in charge: Mrs. J. W. Stant-rough, Mrs. R. L. Farlinger, Mrs. L. Willans and Mrs. T. Holdsworth.

A solemn sense of duty moves us to call attention to a grave error that crept into the columns of last week's News. Sandwiched between the tale of the Killiam druggist who put a kick into his drinks, and the dilemma of a Viking lady with a pet fish, we were horrified to find "Heard at a Bruce dance: Pardon me, dear, but your stockings seem rather wrinkled." You brute; I have no stockings on."

Holding a corner on the Bruce news with all the information that a party line brings in, we admit we didn't hear of this before. Upholding the modesty of our fair sex, an enquiry circulated through in the following replies, viz: that Bruce ladies do not appear in public without stockings; that they have shapely, neither extremities, nor marred by wrinkles (this without fear of contradiction), but such things don't happen at Bruce dances. It simply isn't done. Anyone doubting the truth of these propositions is invited to the next Bruce dance for personal verification. Now having established the fact that this faux pas did not occur in Bruce, can only add that it must be the result of a compositor's error, and suggest that "Bruce" must have been erroneously substituted for "Kinsella".

THANKSGIVING DAY TO BE ON OCTOBER 12th

At the last session of Parliament it was decided to move Thanksgiving Day forward to a date in October as was the custom up until a few years ago and observe November 11th in each year as "Remembrance Day." This has been celebrated heretofore as Armistice Day in conjunction with Thanksgiving, the joint holiday always being observed on the Monday of the week in which November 11th fell. Under the new legislation both days will be observed as public holidays. Thanksgiving has been proclaimed for Monday, October 12th, and Remembrance Day will fall on Wednesday, November 11th. Both will be school holidays.

As a measure of economy the usual district convention of teachers will be discontinued for this year. School authorities and teachers reading this notice are asked to give it as wide publicity as possible that no confusion may result.—J. T. Ross, Deputy Minister.

We Americans are the richest nation in the world with the longest breadlines.—Ernst Morris.

Adjusting the work week is one of the principles of balance necessary to keep sustained prosperity.—William Green.

Instead of shortening the working day (the obvious thing to do) we go on giving all the leisure to an increasing number of parasitic people.—George Bernard Shaw.

It is not law that makes the custom, but the custom that makes the law.—Brand Whitlock.

Never since the war has France found herself from every point of view in a better position to re-establish her situation.—Francis Coly.

Household Helps.

THE HARVEST FEAST

Thanksgiving is upon us—it is early this year! But not too early for the firm red cranberries, for the yellow pumpkins in the cornfield. The turkey gobble, too, as he struts unsuspicious about the barnyard promises well—very well! But hear the wee pigs squealing! For a picturesque and unusual roast which is at the same time tender and delicious, we suggest a suckling pig, stuffed, well cooked, and served on cress, and surrounded with glazed apples. The recipes which follow give the stuffing and apples which are intended for the pig, but the soup, vegetables and desserts may be selected to serve with turkey, duck or beef or pork roast. Sufficient recipes are given, allowing for some choice, to furnish a full course dinner. To supplement these, however, celery, olives, nuts, fruit and candy may be included.

CRANBERRY JULEP—1 pint of cranberries, 1 pint water, 1 cup sugar, strained orange juice, strained lemon juice. Boil the cranberries, water and sugar for ten minutes. Strain through a sieve. Do not mash. Chill the juice and combine with the orange and lemon juice in the proportion of three parts of orange to two parts of cranberry and one part of lemon. Pour over ice cubes in glasses and add a sprig of mint to each glass.

ARTICHOKÉ PUREE—Twenty medium-sized artichokes, 6 celery stalks, 3 tablespoons flour, 2 tablespoons butter, 1-2 pint milk, 1 pint water, 3 oz. cream, salt, pepper, a speck of sugar. Pare the artichokes, cut the celery stalks into bits, boil in salted water until soft enough to pass through a sieve. Put butter and flour into a sauce pan, add the rest of ingredients and let soup simmer fifteen minutes. Serve with croûtons.

ROAST SUCKLING PIG—Make sure that the pig is not more than five or six weeks old and that the butcher has cleaned it thoroughly. Rinse out the inside with clear water and dry. Fill with dressing. Sew up vent securely and place in a kneeling position in a roasting pan, tying the legs in position. Sprinkle with salt and pour about one cup of hot water in the bottom of the pan. Wrap the pig in waxed paper and roast in a moderate oven about three and a half hours, removing the paper half an hour before serving.

PUMPKIN CROQUETTES—1 pint cooked pumpkin, 1 teaspoon salt, 1 tablespoon butter, dash of pepper, 1 tablespoon flour, 1 egg. To the cooked and mashed pumpkin add the other ingredients and mix well. Drop from a spoon into rolled cracker crumbs, mold into croquettes and fry in deep fat until golden brown. These are delicious served with baked or fried ham.

BAKED CRANBERRY PUDDING—1-4 cup shortening, 3-4 cups sugar, 1 egg well beaten, 1-2 cup milk, 1-2 cups flour, 3 teaspoons baking powder, 1-4 teaspoon salt, 1-2 cups cranberries, cut in half, 4 tablespoons sugar. Cream the shortening, add the sugar gradually and then the well beaten egg. Add the milk. Mix and sift together the flour, baking powder and salt.

THE ROAD TO BEAUTY

Artists and other beauty connoisseurs have declared that beauty in girls depends more on health and living habits than on any other factors. Home economic experts of University Farm, Minnesota, seem to agree with this conclusion and recently pointed out the qualifications of a good-looking girl.

They include a clear, smooth skin; bright, clear eyes; glossy hair; strong white teeth; firm, strong muscles; good posture, sitting or standing; normal weight; happy, good-natured disposition, with energy and pep for work and play. To aid in attaining these, the following recipe is offered:

Nine hours sleep with windows open every night. Play or work indoors at least an hour every day. Three regular meals every day. Some suggestions for diet are quoted:

"Milk, cocoa or some other substitute instead of tea or coffee; vegetables other than potato instead of as often as light; green vegetables or salad daily; fruit dessert instead of pie, cake or pudding; fruit, milk and cereal for breakfast instead of griddle cakes, sausage and coffee; fruit, bread and butter, or milk for lunches, instead of candy, pork, hot dogs or ice cream."

This seems like a sensible program and one within the reach of all, well worth the effort required, considering the prize at stake.

Two Fur Coats

It was at Toronto Exhibition last year. A typical American farmer, a true Uncle Sam, even to the bit of spinach on his chin, strolled along the passage way scrutinizing the exhibits. He was a married man of some years—standing as evidenced by the fact that his wife, to whom he spoke frequently, strolled along a few feet in the rear.

Finally he stood quite still and gazed across the passage way. His eyes were fixed upon a moderately sized printed card, framed and supported by an easel which rested upon a table inside the railing.

The expression of his mouth said plainly, "Here's something good. I'll be a new one on neighbor Smart." He didn't move for some minutes. For a few moments after the arrival of the wife there was quiet, animated, but rather happy conversation, accompanied with glances and thumb pointing at the easel across the way. Then the pair, single file, proceeded to cross over.

The attendant who sat by the table upon which the easel rested was attentive and talkative.

"Well, brother, I'll bite. What's the joke?" said our American cousin.

"There is no joke," said the attendant. "If you can place in the hands of the Secretary of this organization at Regina on or before March 1st, 1932, the ten ears of corn which a competent committee of judges conclude are the best ten ears of corn in the world, we will pay you \$800 in good Canadian cash—and you can take the corn back home with you."

The eyes of the pair shifted to the large painting at the rear of the exhibit. "Oh, I see, Mother," said he to Mrs. Sam, "this is a grain show."

They looked again at the easel. "Egad," he muttered, "that's \$80 a cob—a bit fishy, isn't it?"

Then to the wife, "Say, Mother, what did I get at Chicago that time my corn got into the money class?"

She spoke now for the first time. "\$20," she informed him.

"Pretty big price, \$800!"

"Gimme some of your literature," he requested. "You Canadians have put one over us for the present, but wait till 1932 before you grow too loud. Mother and I had planned to take a trip to Texas in '32 but we're coming to Regina and we're going to bring that corn along with us. \$800 of good Canadian cash looks good to me. Two nice fur coats—one for mother and one for me—will help us to put on a bit of style befitting a visit from the 'World's Corn King' when we come back in 1932 to thank you personally for your generosity."

"Good-bye and good luck."

Mr. and Mrs. Sam crossed to the other side of the passage way and resumed their sight seeing where they left off a short time before.

The easel and the card now reposed on the attendant's desk in the office of the World's Grain Exhibition and Conference at Regina. The offer, "\$800 for ten ears of corn" still stands good and it is open to all the world.
